

CNC HIGH-PERFORMANCE SLIDE

FOR MARUI G17

AZ-01

Lighter and sturdier material characteristic brings smoother movement.

Combined with same seal tightness of original slide and more solid barrel fixing method, the accuracy can be improved.

CNC machining process and hard anodizing finished.

No further modification is needed. Easy to DIY.

100% made with AL7075 Aluminium alloy, featured with outstanding tensile strength, resistance to collision, and processed with CNC machining. The military standard hard anodized finishing could improve durability significantly. The slide weight configuration optimized by ICS, could increase the blowback, and present a whole new handling and auditory experience.

- 100% fit the Marui G17 GBB pistol (no modification needed)
- Ultra-lightweight design works well with 8kg green gas.
- Inner barrel not included
- Demonstration gun not included.
